

PROFILE

I am a skilled Python developer with four years of proven track record, specializing in web scraping and data analysis. I possess strong creative and analytical abilities and thrive as a team player with meticulous attention to detail.

SKILLS

- Web Scraping
- Data analysis
- Problem-Solving
- Web Developing
- Machine Learning
- Docker
- AWS

EDUCATION

Bachelor of Science

P.M Patel college - Anand
2015-2018

LANGUAGES

- English
- Hindi
- Gujarati

EXPERIENCE

WEB SCRAPING

2019-Present

- Utilized Python's Scrapy and requests for data extraction from diverse sources.
- Overcame anti-scraping obstacles like CAPTCHAs through CAPTCHA-solving services or manual coding.
- Established scheduled scraping routines with tools like cron jobs or scheduling libraries.
- Organized data storage in formats including CSV, JSON, and databases.
- Thoroughly documented the scraping process, codebase, and project setup for future use.

DATA ANALYSIS

2019 - Present

- Performed in-depth data analysis using Python, employing libraries such as Pandas, NumPy, and Matplotlib to uncover insights and trends.
- Ensured accurate insights by cleaning, transforming, and preprocessing raw data.
- Applied advanced statistical and machine learning methods to extract meaningful conclusions.
- Created data visualizations and interactive dashboards using Matplotlib, Seaborn, or Plotly to communicate findings.
- Interpreted results within the project goals' context, showcasing solid problem-solving skills and domain knowledge.

OTHER

- Machine Learning
- Web Developing
